

Certified Information Privacy Manager (CIPM)

Prehľad

The CIPM is the world's first and only certification in privacy programme management. When a student earns a CIPM, it shows that you know how to make a privacy programme work for your organisation. In other words, you're the go-to person for day-to-day operations when it comes to data protection. The CIPM program was developed by the International Association of Privacy Professionals (IAPP), which is the world's largest comprehensive global information privacy community and resource. The CIPM certification also holds accreditation under ISO 17024: 2012.

Vzdelávacie ciele

Principles of Privacy Program Management is the how-to training on implementing a privacy program framework, managing the privacy program operational lifecycle and structuring a knowledgeable, high-performing privacy team. Those taking this course will learn the skills to manage privacy in an organization through process and technology—regardless of jurisdiction or industry.

The Principles of Privacy Program Management training is based on the body of knowledge for the IAPP's ANSI accredited Certified Information Privacy Manager (CIPM) certification program.

Introduction to privacy program management

Identifies privacy program management responsibilities, and describes the role of accountability in privacy program management.

Privacy governance

Examines considerations for developing and implementing a privacy program, including the position of the privacy function within the organization, role of the DPO, program scope and charter, privacy strategy, support and ongoing involvement of key functions and privacy frameworks.

Applicable laws and regulations

Discusses the regulatory environment, common elements across jurisdictions and strategies for aligning compliance with organizational strategy.

Data assessments

Relates practical processes for creating and using data inventories/maps, gap analyses, privacy assessments, privacy impact assessments/data protection impact assessments and vendor assessments.

Policies

Describes common types of privacy-related policies, outlines components and offers strategies for implementation.
