

## Red Hat RHCSA Rapid Track Course with Exam (RH200)

### Prehľad

This course is designed for experienced Linux System Administrators who want to harden their technical skill sets and become accredited with the RHCSA certification.

### Vzdelávacie ciele

#### Establish Network Connectivity

Configure, manage, and test static network settings

#### Administer Users and Groups

Implement password aging and configure an LDAP client

#### Monitor System Resources

Manage CPU, memory, and disk utilization; manage system logs

#### Manage System Software

Install software and query with yum using RHN and a custom repository

#### Deploy Network Services

Deploy VNC, FTP, and web services and require key authentication with SSH

#### Secure Filesystems and Network Services

Restrict file access with ACLs and secure network services with a firewall and SELinux

#### Manage Physical Storage

Manage encrypted partitions, filesystems, and swap space

#### Manage Logical Volumes

Understand Logical Volume concepts and manage Logical Volumes, including snapshots

[Online registrácia](#)

### Termíny

Trvanie kurzu (v dňoch): 5 Days

G2R = "Garantovaný termín" | OLL = "Online LIVE"  
ILT = "Kurz vedený inštruktorom"

*Pre tento kurz aktuálne nemáme plánované žiadne verejné termíny. Prosím, použite naše kontaktné informácie a vyžiadajte si od nás ďalšie termíny školení pre verejné triedy, alebo nám zašlite vašu žiadosť o školenie v privátnej triede.*

## Control the Boot Process

Understand runlevels and manage GRUB

---

## Tune and Maintain the Kernel

Pass parameters to the kernel and manage kernel modules

---

## Automate Installation with Kickstart

Create kickstart configurations and use them to install Linux

---

## Manage Virtual Machines

Deploy and manage KVM virtual machines

---

## Troubleshoot System Problems

Apply a systematic approach to diagnosing and correcting system failures

---

## Research Red Hat Resources

Access Red Hat documentation and services

---
